

# LARK STREET PROPOSED PARKING REGULATIONS

**GOAL:** Improve parking access by facilitating turn-over and providing designated spaces for short-term parking activities

## PARKING ANALYSIS FINDINGS

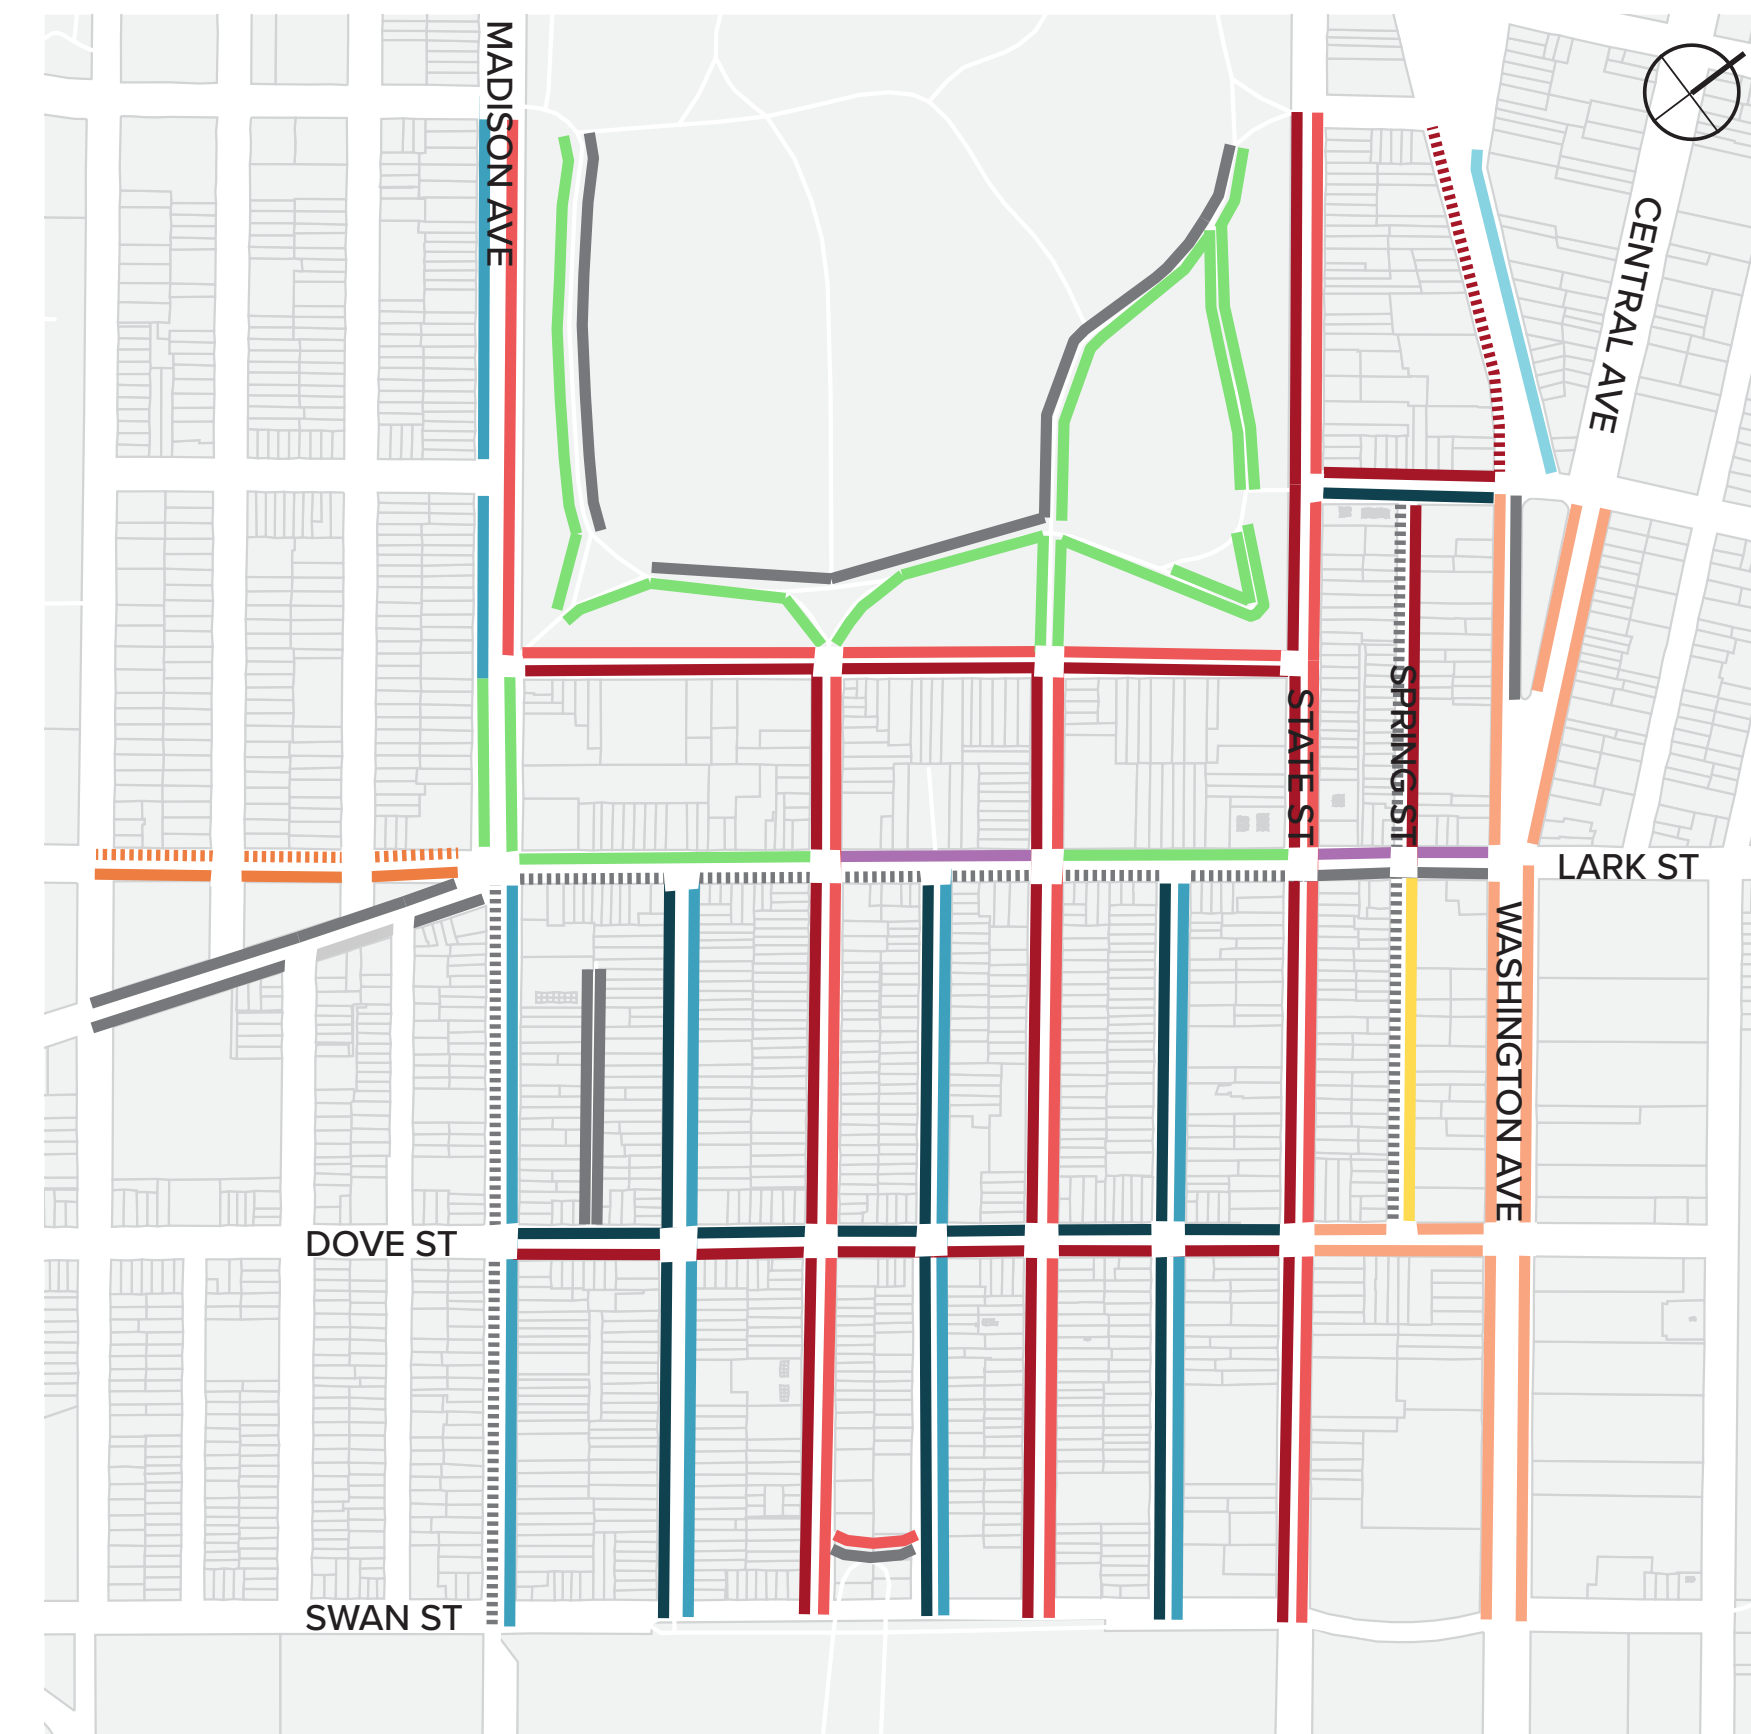

- On-street parking utilization is highest on and around Lark Street on weekend mornings (~75% of available spaces were occupied) and is lowest on weekday afternoons (~64% of available spaces were occupied).
- On Lark Street, between Madison and Washington Avenues, **on-street parking utilization is highest on weekend afternoons** (an average of 80% of available spaces were occupied) and **lowest on weekday evenings** (an average of 48% of available spaces were occupied).

## KEY RECOMMENDATIONS

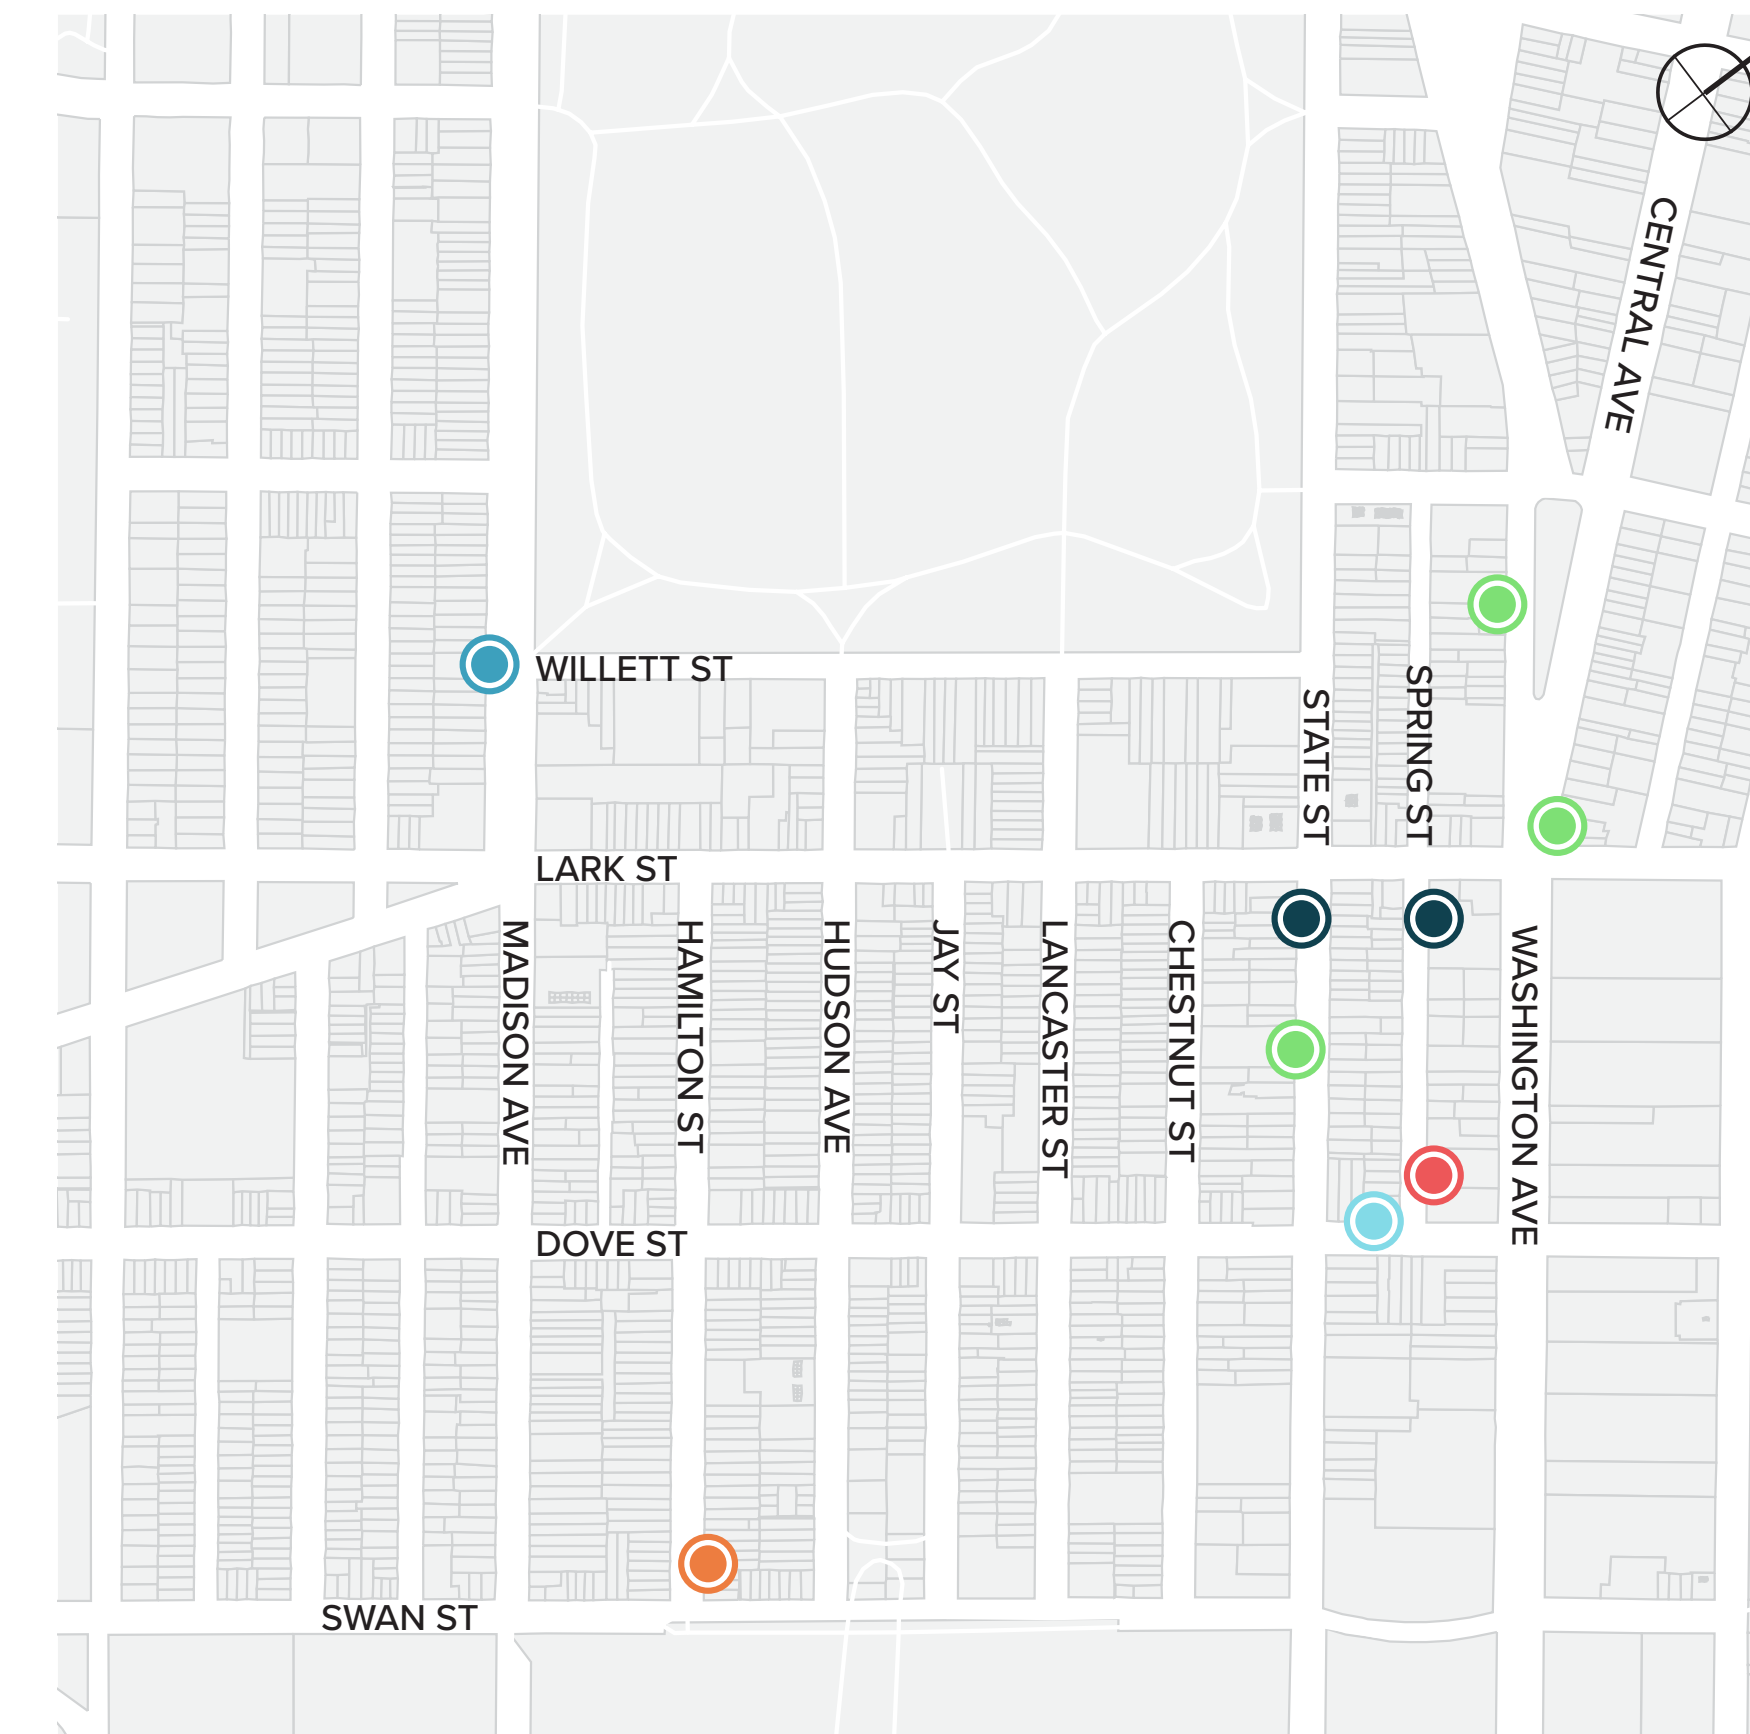

- 90 minute parking limit retained** along a majority of Lark Street
- Parking on east side of Lark Street prohibited** and street cleaning limited to a 2-hour window during a weekday.
- 30 minute parking limits removed from Lark Street and replaced with 15 minute zones for short-term activities** (e.g., loading, drop-off/pick-up) near busy commercial areas.
- 15-minute parking zones vary in size** to confine large commercial vehicles to Lark Street and prevent truck traffic in neighborhoods.
- Extended time frames for short-term parking to accommodate late-night activities**, such as food deliveries/pick-ups and ride sharing.
- Metering along Lark Street is not proposed** at this time.

## EXISTING ON-STREET PARKING REGULATIONS
